

The Canadian Light Source invites science teachers at the middle years, high school, and college levels to our annual Teachers' Workshop in Saskatoon, Dec 2-4 (Fri, Sat, Sun), 2016. Our purpose is to build a stronger connection between scientific research and science education as well as to provide training so teachers have the opportunity to engage their students in authentic synchrotron research of their own. Limited funding is available.

What's in it for you?

- ◆ Connect with current research & scientists & colleagues for ideas to engage your students
 - ◆ Open the door for your students to participate in Students on the Beamlines
 - ◆ Curriculum resource package included
